Stack Load	14,000 lbs
Tare Weight	92 lbs
Truckload Quantity	120
Material	High-density polyethylene structural foam
Runners	Replaceable and available on both the 48" and 40" sides

MACX® Harvest BINS

## DESIGNED FOR THE DEMANDS OF AGRICULTURAL MATERIAL HANDLING

### BUILT FOR AGRICULTURAL APPLICATIONS

Our bins are engineered to fit directly on harvesting equipment and move produce from the field to processing or go straight to market.

### FOOD-FRIENDLY

Our plastic bins meet USDA standards and protect your product from splinters, pests, pathogens, mold or other undesirable elements commonly found in wood bins.

### MULTIPLE CONFIGURATIONS

Abundant size options, solid or vented sizes, flexible runner configurations, and great color choices are part of our standard offering. Plus, you can customize sizes, add casters, doors, lids, drains, RFID tracking and more.

### COMPACT & STACKABLE

We've built efficiency into our designs. All bins are stackable and either nest or break down to store inside each other when not in use.

### DESIGNED TO LAST & PROTECT

Smooth surfaces and rounded corners safeguard your contents from damage. Bins are maintenance-free and stand up to repeated power washing or steam cleaning.

### LARGE INVENTORY & FAST SHIPPING

We work hard to keep inventory on hand and ready to ship. Just need a few bins? No worries. We never require minimum quantities for standard products.

### REUSABLE & RECYCLABLE

Bins are engineered from high-density polyethylene which is stable and durable. When their useful lives are over, they're 100% recyclable for zero waste to landfill.
